

HYBR

Hybr® is a hybrid-cloud management, automation and integration platform. Hybr offers a multi-tenant portal experience that enables provisioning and management of IaaS VMs and other resources.

“

The Cloud Assert team has been fantastic to work with. Highly effective at communication, understanding our needs, very impressive initiative and efficiency. Expressing our deadline to meet our requirements to go live, the Cloud Assert team provided us immediate results, all the while working with us on any and all customization, we requested to bring the product in our environment to its full potential.

- Mike, Fortune 100 Healthcare Customer
